Neighbor

Valley Road
Warrington, PA 18974

Dear Neighbor,

As part of our commitment to being a good corporate neighbor we want to update everyone on our successes in the last year and our plans for next year.

If you are new to the neighborhood you may not be aware of our company and our products. We are a boutique chemical company specializing in highly pure, highly technical compounds and blends sold to major corporations worldwide. Polysciences gets its name by being able to manufacture many different types of chemicals for many sciences. All of our products are made in small batch sizes under the supervision of degreed chemists. For more detailed description of our company can be found on our website are www.polysciences.com.

In the past year we completed a series of major internal renovations at both 400 Valley Road and 1981 Countyline Road. This included upgrades to our sprinkler system to include the ability to deliver foam in addition to water. This will drastically reduce the time it takes to extinguish any fire. These changes have allowed us to move forward on projects to manufacture materials for use in medical devices.

In the next year we hope to continue to transform our company into a specialty chemical manufacturer for the medical device industry. To do this we must design and remodel our existing spaces to meet the demanding requirements of the FDA and your safety.

We are interested in any comments you may have as we realize that your input is unique and valuable for our growth in this unique neighborhood. As always if you have any questions or would like to visit us please contact me.

Sincerely,

Daniel A. Fannon
Regulatory Manager
