Neighbor

Valley Road

Warrington, PA 18974

Dear Neighbor,

As part of our commitment to being a good corporate neighbor we want to update everyone on our successes in the last year and our plans for next year.

If you are new to the neighborhood you may not be aware of our company and our products. We are a boutique chemical company specializing in highly pure, highly technical compounds and blends sold to major corporations worldwide. Polysciences gets its name by being able to manufacture many different types of chemicals for many sciences. All of our products are made in small batch sizes under the supervision of degreed chemists. For more detailed description of our company can be found on our website are www.polysciences.com.

In the past year we have completed an interior remodeling to convert former warehouse space to new laboratories capable of making products for our customers who need clean room manufacturing. We hosted a walkthrough by the entire Warrington Fire Company to allow them to make their response safe and productive when needed. This was in response to our prior upgrade to our fire suppression system. Rather than only water in our sprinkler system, now one of our buildings has a foam system that drastically improves our ability to contain fires. Also due to the unique nature of our business we have been audited for our safety and quality systems more than 15 times in the last year. These include annual government inspections which confirm our continued compliance with safety and production standards. Even our customers inspect us to confirm that we continue to be a responsible partner for their products. In the next year we have no current plans for expansion in Warrington, but look forward to receiving recognition as a certified medical device company. Due to our business growth we expect to increase our work force by adding new chemists to meet expected demand from new customers.

We are interested in any comments you may have as we realize that your input is unique and valuable for our growth in this unique neighborhood. As always if you have any questions or would like to visit us please contact me.

Sincerely,

Daniel A. Fannon

Regulatory Manager
