Dear Neighbor,

As part of our commitment to being a good corporate neighbor we want to update everyone on our successes in the last year and our plans for the new year.

If you are new to the neighborhood you may not be aware of our company and our products. We are a boutique chemical company specializing in highly pure, highly technical compounds and blends sold to major corporations worldwide. Polysciences gets its name by being able to manufacture many different types of chemicals for many sciences. All of our products are made in small batch sizes under the supervision of degreed chemists. We have been certified as an ISO Quality Manufacturing site for medical devices and general chemicals. A more detailed description of our company can be found on our website at [www.polysciences.com](http://www.polysciences.com).

In the past year we have upgraded a large portion of our warehouse at 424 Valley Road. Our upgrade was designed to improve the safety of the storage area. We installed a foam fire suppression system that works in conjunction with our existing sprinkler system to drastically improve our ability to contain fires. This is the second such warehouse we have converted to the system and we are still the only facility in the Township that has this level of protection.

Due to the unique nature of our business we have been audited for our safety and quality systems more than 20 times in the last year. These include annual government inspections which confirm our continued compliance with safety and production standards.

In the next year we will expand our commitment to Warrington as our lease for 1993 County Line Road has allowed us to move offices and light warehouse into that location. This expansion is a testament to the demand for our American made products. The expansion will mean that we can continue to support the area with high tech employment opportunities and low impact manufacturing.

We are interested in any comments you may have as we realize that your input is unique and valuable for our growth in this unique neighborhood. As always if you have any questions or would like to visit us please contact me.

Sincerely,

Daniel A. Fannon

Regulatory Manager
