Polysciences, Inc. Appoints New Product Manager for Life Sciences Division

Warrington, PA, March 2014 - Polysciences, Inc., an [award-winning](#) company specializing in the development and manufacture of high purity chemicals and reagents for laboratory research, announced the appointment of Kimberly Glover as new Product Manager of its Life Sciences Division. In this role, Ms. Glover will assume responsibility of Polysciences' Life Sciences product lines, including; histology, light microscopy and anatomic pathology, as well as products for various clinical and research applications.

As a Certified Histotechnologist and Research Scientist, Ms. Glover brings more than 20 years of experience in preclinical and clinical laboratory environments; and extensive knowledge of histology, pathology and Drug Safety Assessment in both Good Laboratory Practice (GLP) and Non-GLP environments to Polysciences. Ms. Glover received her Bachelors of Science Degree in Biology from Chestnut Hill College. She maintains her Histology Technician (HT) Certification through the American Society for Clinical Pathology (ASCP), as well as, a Laser Capture Microdissection Certification from Arcturus Engineering. Ms. Glover maintains membership in the [National Society of Histotechnology \(NSH\)](#), New Jersey Society of Histotechnology (NJSH) and the American Society for Clinical Pathology.

"I'm excited to have Kimberly on the team as a colleague and peer. Her extensive experience in research laboratory settings will allow her to support our product lines and interact with our customers at a high technical level," said Joseph Masrud, Catalog Business Development Manager.

Polysciences' full product catalog contains over 4000 unique and specialty products used by histology professionals, lab technicians, pathologists, chemists and scientists, including; embedding media, special stain kits, tissue marking dyes, mounting media, fixatives, certified and fluorescent dyes & stains, IHC and In Situ products.

About Polysciences, Inc.

Polysciences Inc. was founded in 1961 and specializes in the development and manufacturing of high purity chemicals and reagents for laboratory research, histology, healthcare diagnostics, and medical devices. Their work in the biomedical and pharmaceutical industries has helped bring about countless innovations in healthcare, and their offerings in high performance adhesives and personal care products offer even more innovative opportunities for the company.
