## **Polysciences, Inc. Appoints Scott Knorr to Director, Lab Products Bulk & Synthesis**

**Warrington, PA, May 2014** - Knorr will join Dr. Joel Coret, Polysciences' CTO, and his team in the on-going development of novel monomers, polymers, and fine chemicals used in diverse biomedical applications, such as ophthalmic lenses and drug delivery devices, as well as specialty industrial applications. Knorr brings a wealth of knowledge and over 20 years of experience in the chemical industry, focused on commercializing innovative, high-value, custom components for medical, pharmaceutical and specialty industrial applications.

Commenting on his appointment Knorr stated, "Polysciences offers a unique combination of material expertise, manufacturing capabilities and custom development to assist customers in bringing new products to market. I'm excited to join the team and look forward to contributing to the organization's ongoing successes."

Prior to joining Polysciences, Knorr held key positions with Adhesives Research, Inc. (Glen Rock, PA), overseeing the company's global business activities as a component supplier to the medical device, diagnostic and wound care industries. Knorr received his Bachelor of Science degree in Chemical Engineering from The Pennsylvania State University (State College, PA) and Masters of Business Administration from the University of Maryland - Robert H. Smith School of Business (College Park, MD).

"Scott Knorr's appointment signifies our on-going commitment to customers to expand our product offerings for medical device and drug delivery applications," said Michael Ott, President and CEO. "Ever-increasing demand from our customers for novel products and highly technical solutions has led us to add to our accomplished team, and we are confident that Scott will be a great asset to our customers on many levels."

### **About Polysciences, Inc.**

Polysciences Inc. was founded in 1961 and specializes in the development and manufacturing of high purity chemicals and reagents for laboratory research, histology, healthcare diagnostics, and medical devices. Their work in the biomedical and pharmaceutical industries has helped bring about countless innovations in healthcare, and their offerings in high performance adhesives and personal care products offer even more innovative opportunities for the company.
