Polysciences, Inc. hosts Congressman Mike Fitzpatrick as part of his '100 Businesses in 100 Days' Tour

Congressman Fitzpatrick (PA-8) visited Polysciences as part of his '100 Businesses in 100 Days' tour, during which he visits 100 businesses throughout Bucks and Montgomery counties each summer to get a firsthand account of the local economy.

Warrington, PA, August 19, 2014 - Polysciences, Inc., an award-winning company specializing in the development and manufacture of high purity chemicals and reagents for laboratory research, histology, healthcare diagnostics and [biomedical applications](#), hosted Congressman Mike Fitzpatrick as part of his annual '100 Businesses in 100 Days' Tour on Monday, August 18, 2014.

Congressman Fitzpatrick first met with management team members to learn about Polysciences and how the company is supporting the local economy through its continued growth and hiring of local employees. Congressman Fitzpatrick's tour included corporate offices, warehouses and laboratories, all located in the heart of the Congressman's 8th Congressional District.

"We were honored to host Congressman Fitzpatrick, who has been very supportive of local businesses and U.S manufacturing. During his tour of our facilities, we were able to show the congressman the current expansion of laboratory space, as well as explain a few of our projects within the [Life Sciences](#) and Biomedical segments", said Michael Ott, President and CEO of Polysciences.

At the conclusion of the tour, Congressman Fitzpatrick took time to hold a Q & A session with Polysciences employees. Polysciences would like to thank Congressman Fitzpatrick for taking the time to visit us. We applaud him for supporting the small businesses in his district, as well as his efforts to create and preserve American jobs.

About Polysciences, Inc.

Polysciences Inc. was founded in 1961 and specializes in the development and manufacture of high purity chemicals and reagents for laboratory research, histology, healthcare diagnostics and medical devices. Materials developed for the biomedical and pharmaceutical industries have helped bring about countless innovations in healthcare as well as in high performance adhesives and personal care products.
