PRESS RELEASE

For Immediate Release

Polysciences, Inc. Awarded ISO 9001:2008 & ISO 13485:2003 Certifications

July 10, 2013, Warrington, PA - Polysciences, Inc. announced today that it has achieved dual certification for ISO 9001:2008 and ISO 13485:2003 for its quality management systems applicable to the design, manufacture and packaging of specialty chemicals (ISO 9001:2008 certification) and the design, manufacture and packaging of dye and chemical solution stains; general purpose reagents and specialty chemicals and finished components used in medical applications (ISO 13485:2003 certification).

“Polysciences’ commitment to quality and customer service drives the growth of our business”, said President & CEO, Michael Ott. “These certifications mark another milestone in our continuous effort to supply customers exactly what products they want, when they want them.”

ISO 9001:2008 certification specifies international standards for a quality management system where an organization needs to demonstrate its ability to consistently provide product that meets customer and regulatory requirements and its aim to enhance customer satisfaction, including processes for continual improvement.

ISO 13485:2003 certification is globally recognized for establishing a standardized quality management system for the design and manufacture of medical devices that meets both customer and regulatory requirements.

About Polysciences, Inc.

Polysciences, Inc. is a leading manufacturer of laboratory products and specialty monomers/polymers for microscopy, histology, biotechnology, electronics and other industrial applications headquartered in Warrington, PA. While Polysciences offers a full line of off-the-shelf products for the medical, life sciences, and research communities, its specialty is developing custom-synthesized polymers and monomers for customer-specific needs. Polysciences produces encapsulants and other specialty products for the electronics industry, and is an FDA/cGMP facility for the manufacture and packaging of ultra-pure specialty products for the healthcare, pharmaceutical, and personal care industries. Polysciences has more than 50 years of history successfully partnering with industry to develop specialty materials for emerging applications. Polysciences, Inc. maintains facilities in Warrington, PA, Eppelheim, Germany and Taipei, Taiwan. In addition, its wholly owned subsidiary, Bangs Laboratories, Inc. is located in Fishers, IN.
