

Polysciences, Inc. Receives Two National Awards for EHS Efforts

Company Honored for Product Stewardship and Employee Training and Engagement

WARRINGTON, PA – Polysciences, Inc., is pleased to announce it has been recognized by the Society of Chemical Manufacturers & Affiliates (SOCMA) for excellence in environmental, health and safety (EHS) initiatives. SOCMA is the leading trade association representing specialty and batch chemical manufacturers and service providers.

Polysciences is a longtime participant of ChemStewards®, SOCMA's rigorous program to foster and improve upon a culture of facility safety, product stewardship, environmental safeguards, risk reduction and stakeholder engagement. Now in its 17th year, the annual Performance Improvement Awards showcase companies demonstrating best practices in these areas.

Polysciences received two 2022 Silver Performance Improvement Awards in the categories of Product Stewardship and Employee Training and Engagement. Company representatives were recognized in-person for its achievements at the 2022 SOCMA Summit, November 14-16, in New Orleans, LA.

Award judges commended the site's conscious and continuous efforts in the category of Product Stewardship throughout the past year, including undergoing a process of clearing high-hazard areas and obtaining an additional 100% of functional space throughout the plant.

In the area of Employee Training and Engagement, Polysciences conducts regular training opportunities for its staff, through programs such as Lean Six Sigma, OSHA 10 Hour, Management Leadership, and Procurement bootcamps. The facility was also praised for its integration of a new Learning Management System and a Catalyst Team, comprised of cross-functional site workers that meets regularly to drive engagement across the facility.

"The Polysciences team works hard to set and surpass EHS goals that underpin company values of safety, quality and productivity in everything we do," said Arielle Golod, EHS Manager, Polysciences, Inc. "We are honored to receive these awards, which demonstrate our commitment to providing the highest quality of products and services to our customers."

"SOCMA is proud to have members like Polysciences who consistently raise industry standards around safety and innovation," said Jennifer Abril, SOCMA President & CEO. "We applaud them for their leadership and look forward to their continued contributions to a platform of best practice sharing, which in turn strengthens manufacturing and operations across the specialty chemical value chain."

About SOCMA

The Society of Chemical Manufacturers & Affiliates (SOCMA) is part of a \$300 billion industry that's fueling the U.S. economy. www.socma.org
